Rawmotion is currently looking for:

## Service Operators/Technicians, Data- & TV Graphics Services – Live Sports Production

*Employment type: Freelance, project based, on location world-wide*

*Contact: Simon Bischof - [jobs@rawmotion.com](mailto:jobs@rawmotion.com)*

---

### Go live with us: Join the Rawmotion team

Rawmotion is a leading live sports production company, providing data & results as well as TV graphics services for major sports events world-wide.

Using our own custom-built software and hardware solutions, we collect, process, calculate, distribute and visualize sports data for our clients, with a focus on authentic, engaging and fitting storytelling. Driven by creativity, reliability and passion, we work closely with our clients and create unique live sports experiences for spectators on-site and fans all around the world.

As a company as well as individuals, we are passionate about freestyle and action sports but we also apply our skill set and experience to select other sports. Be it snowboarding or free skiing, mountain biking, skateboarding or BMX, motor sports, breakdancing or cliff diving and more – we cover it all and as part of our team you will always be at the center of the action.

### Hands on: What you will be doing

As Service Operator/Technician, you will

- travel autonomously or with other team members to sports events and venues in Europe and around the world
- handle, set up and configure sensitive computer hardware and other systems
- set up, test and derig the local network infrastructure and workspaces
- prepare data and content required for the service delivery as well as setting up custom applications
- assist or support the project manager and other team members
- contribute to our internal knowledge base with feedback during the production as well as after the event

You will get trained to provide services in one or multiple areas:

- prepare and deliver on-site services as **Graphics Producer/Operator** (using custom CG software and graphics middleware) to support live streaming and TV broadcasts. You will collaborate closely with the data service team and broadcast team to prepare content and produce on-air graphics based on the run of show
- prepare and deliver on-site services as **Scoring and Data Manager** (using custom scoring and data applications) during sports competitions. You will collaborate closely with the judging panel and competition officials as well as the broadcast team to ensure instant delivery and distribution of accurate data and results to all stakeholders

# RAWMOTION

- prepare and deliver on-site services as **Timing Manager/Operator** (using custom timing applications and timing hardware) during sports competition. You will be part of the timing team and ensure accurate times and results as well as the instant delivery of data and results to all stakeholders

## What we are looking for

- whether you have a university degree, hands on experience or you're looking for a career change: it is key to us that you are open minded, authentic, motivated and passionate about sports and technology
- you are a tech-savvy digital native and enjoy working with custom software applications and technical systems
- you are fluent (written and spoken) in English. Additional languages are a plus
- work experience in fields such as event production, broadcasting or IT/technology is a plus
- you are passionate about the sports we are involved in
- you are level-headed, stress resistant and thrive in high-pressure environments. You understand that your actions have a direct impact on live TV and competition results
- you enjoy living a nomadic lifestyle, don't mind long intercontinental flights and are willing to work adventurous hours. We may travel around the globe for up to two weeks at a time
- you are highly flexible and your lifestyle caters to being available at short notice for projects that are dynamically shaping up in the fast-paced live event production world

## The Rawmotion experience: What's in it for you

- competitive day-rates based on experience and performance
- all travel expenses and meals will be covered
- see the world – You will be part of some of the biggest events in sports and get to see some of the most unique and spectacular locations on earth
- be part of the action – Experience sports and competitions firsthand while you are working
- build your network – You get to work with a bunch of interesting people: event organizers, industry heavy weights, judges and athletes
- develop and thrive in an exciting work environment. At Rawmotion, we are supporting our freelancers with regular assignments to keep you a part of the team
